Tampering Analysis

Prediction	Tampered
Confidence	90.36%
Risk Level	High
Risk Score	90.36
Tampering Type	Strong suspected manipulation
Affected Region	High-confidence manipulated region highlighted in heatmap
Localization Status	Available
Recommendation	Manual forensic verification recommended before using this image as trusted digital ev

Decision Summary

Overview

Manipulation status: Tampered.

Analysis

The tampering detector confidence is 90.36% (High).

Recommendation

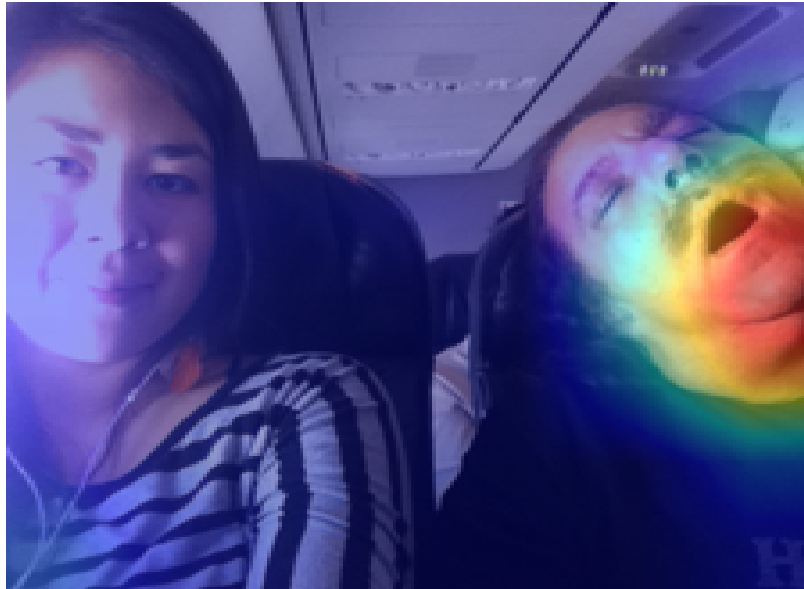

The image contains visual patterns consistent with possible digital manipulation.

Risk level is high, so manual forensic verification is recommended.

Tampering heatmap is available and highlights the region used for the model decision.

Recommendation: Manual verification recommended before using this image as trusted evidence.
